HTML/CSS : Intermediate

JavaScript : Beginner +

FOREIGN LANGUAGES

English : 860 TOEIC

German : B1+

I have been passionate about science since I was very young. This is the reason why I hope to become a competent and efficient computer engineer. Therefore I am looking for an internship in this field in order to acquire new skills and learn to work in teams.

WORK EXPERIENCE

June 2022 - August 2022

Bartender

Europapark Hotels

During the summer of 2022, I did my first job: bartender in one of the hotels of the Europa-Park theme park. Thanks to this first job, I was able to discover the world of work as well as to develop my teamwork skills.

EDUCATION

2021 - Present

Bachelor Of Computer Science

EPITA

During the last two years, I studied computer science at EPITA, a French school specialized in this field.

January 2023

Chulalongkorn University - Thailand

May 2023

For one semester, I studied computer science at Chulalongkorn University.

2021

Baccalaureate with grade "Bien"

SKILLS

Artificial Intelligence

I am able to create an artificial intelligence using a neural network structure, the gradient descent and the backpropagation

Website

I can create a basic website using HTML/CSS and Node.js for the server side

Problem solving

I love solving puzzles. Thanks to this, problem solving is something instinctive for me and I enjoy it.

PROJECTS

OCR Sudoku Solver

This project was realized in collaboration with 3 associates. It is a software written in C that solves sudokus from images. My goal in this project was to create an artificial intelligence to classify images of numbers.

The legendary world : Eldorado

The legendary world : Eldorado is a MMORPG created using unity in collaboration with 3 associates. My objective was to create the network part, the save, the account system and the inventory.
